DETAILED ACTION

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art teaches determining the value of the number in a spreadsheet program, displaying the plurality of sample number formats; receiving an indication of a selection of one of the plurality of sample number formats.

The prior art fails to teach

a) being able to select a locale from within a spreadsheet application independent of regional settings that cross-references the category indication and the locale identifier selected from a Format Cells dialog within the spreadsheet application independent of operating system regional format settings.

b) in Excel 2000 of being able to (1) receive a locale identifier selection from within a spreadsheet application module independent of regional settings to be applied only to numbers within the spreadsheet application and (2) cross-referencing the category indication and the locale identifier selected from a Format Cells dialog within the spreadsheet application independent of regional format settings.

c) in Excel 2000, a locale identification used to determine what language in which to render the number independent of regional settings associated with the spreadsheet program module.

The Examiner allows the claimed invention because the prior art does not teach the limitations when combined with each other in the manner limited in the claims, and not as individual limitations. Furthermore, the Examiner interprets the claims in view of

the example of the locale specifier with a base number format as described on page 10, lines 5-19 of the specifications.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
